DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-3 and 6-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Nguyen et al (US Patent No. 6,272,462).

3. Regarding claims 1-3 and 6-17, Nguyen et al teach a method of supervised adaptation using corrective N-best decoding which implements

Utterance alignment for correct and incorrect alignment data at col. 5, lines 11-42

Using the incorrect model data in the adaptation process at col. 5, lines 28-31 and lines 39-42

Model adaptation with implementation of mean values at col. 5, line 52 – col. 7, line 10

Iterative training at col. 3, lines 26-31

N-best hypothesis list at col. 2, lines 58-62

Multi-pass adaptation at col. 4, lines 42-60

Suggests a car navigation routing apparatus as a particular application of the system at col. 4, line 64 – col. 5, line 5.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nguyen et al in view of Roberts et al (US Patent No. 5,027,406).

6. Regarding claims 4 and 5, Nguyen et al teach everything as claimed in claimed 1. Nguyen et al do not teach user confirmation for indicating a correct or incorrect recognition. Refer to Roberts et al who teach an interactive speech recognition and training method which allows for user confirmation of a recognized utterance, for the purpose of creating or updating an acoustic model of the word (abstract).

It would have been obvious to one of ordinary skill at the time of invention to modify the speech recognition adaptation system of Nguyen et al to implement user confirmation of recognized utterances as suggested by Roberts, for the purpose of updating the acoustic model of the utterance, as suggested by Roberts, thereby improving the recognition performance of the system.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
8. Juang et al (US Patent No. 6,076,053) teach a method and apparatus for discriminative training which implements an N-best algorithm and parameter adaptation.
9. Sejnoha (US Patent No. 6,260,013) teach a speech recognition system that uses a discriminative training procedure for speech models.
